THE NEW YORK STOCK BOARD.

The Enterprise says: This is a matter of great interest to the people of Nevada, as it is presumed that the stocks dealt in by the new Board will be the representatives of Pacific Coast mines, and Comstock shares will doubtless figure prominetly on the lists. Thousands of shares of Nevada mining stocks are held in New York City, and during the last three or four years many handsome transactions have been made by a few operators in that city. Since the late developments on the northern Comstock the demand for Nevada mining stocks has increased, and to facilitate transactions the establishment of a Mining Stock Board is urged. The precise effects of this, should it be consumated, cannot be determined, as the extent to which Comstock shares would be dealt in is problematical. Should the operators of the great metropolis give the new movement the encouragement which it is believed they are prepared to offer, substantial results may be expected. Could the stock markets of San Francisco and Virginia be relieved of a portion of the burden involved in the handling of mining stocks to the value of two hundred and fifty millions of dollars, there would be more that they will not put a head on their editorials. there would be more stability in prices would be less violent.
